

Upload Image To IBM Container

Task	TSK-262933
Team ID	PNT2022TMID44584

CREATING REPOSITORY IN IBM CLOUD:

Create repository

1. Tag an image to point to this registry. Choose a local image, target namespace, and target repository.

```
docker tag <local_image> icr.io/<my_namespace>/<my_repo>
```

2. Push the tagged image.

```
docker push icr.io/<my_namespace>/<my_repo>
```

UPLOAD IMAGE TO IBM CONTAINER REGISTRY:

The screenshot shows the IBM Cloud Container Registry interface. On the left is a dark sidebar with navigation links: 'Container Registry', 'Quick start', 'Namespaces' (1), 'Repositories' (1, highlighted), 'Images' (1), 'Trash' (0), and 'Settings'. The main area is titled 'Repositories' and has a 'Location' dropdown set to 'Global'. Below this is a search bar and a 'Create +' button. A table lists the repositories with columns for Name, Image count, Namespace, and Last updated. One repository, 'ibmproj', is listed with 1 image, namespace 'myproj', and updated 4 days ago. At the bottom, there are pagination controls showing 'Items per page: 25', '1-1 of 1 item', and '1 of 1 page'.

Name	Image count	Namespace	Last updated
ibmproj icr.io/myproj/ibmproj	1	myproj	4 days ago
